

DATA SHEET

Proofpoint Nuclei Discovery and Archive Suite

Compliance-grade capture, e-discovery, reconciliation, and archiving. Optional AI-powered conduct monitoring and supervision.

Deployed in minutes and managed in one place.

Why Nuclei Suite

Modern compliance shouldn't be complex or cost prohibitive. Proofpoint Nuclei Discovery and Archive Suite (Nuclei Suite) is part of the Proofpoint Digital Communications Governance portfolio of solutions. Nuclei Suite is designed for regulated and highly litigious small- to medium-sized organizations that need a compliant capture, storage, e-discovery, and supervision solution. It provides fast time to value, effortless usability, and modern enterprise compliance capabilities—all without the high price tag.

Designed for speed and simplicity

- **Self-service deployment** — no professional services required
- **Cloud-native, serverless architecture** that scales automatically
- **Built for lean IT, security and compliance teams**

One solution. One view. Total control.

Nuclei Suite is a true unified solution for all archiving, e-discovery, and compliance supervision activities. You can capture, retain, search, review, investigate, supervise, reconcile, defensively dispose of, and export communications from a single intuitive interface. Because you don't have to switch tools or stitch together workflows, it streamlines administration.

Nuclei Suite provides:

- Unified administrative, e-discovery, supervision, and user workflows.
- Self-service search, litigation hold, and export features with easily provisioned end-user access to personal archives.
- Native review of messages, attachments, audio, and video.
- Out-of-the-box, AI-powered supervision and conduct and compliance risk monitoring. Easily create or edit risk detection scenarios and policies.

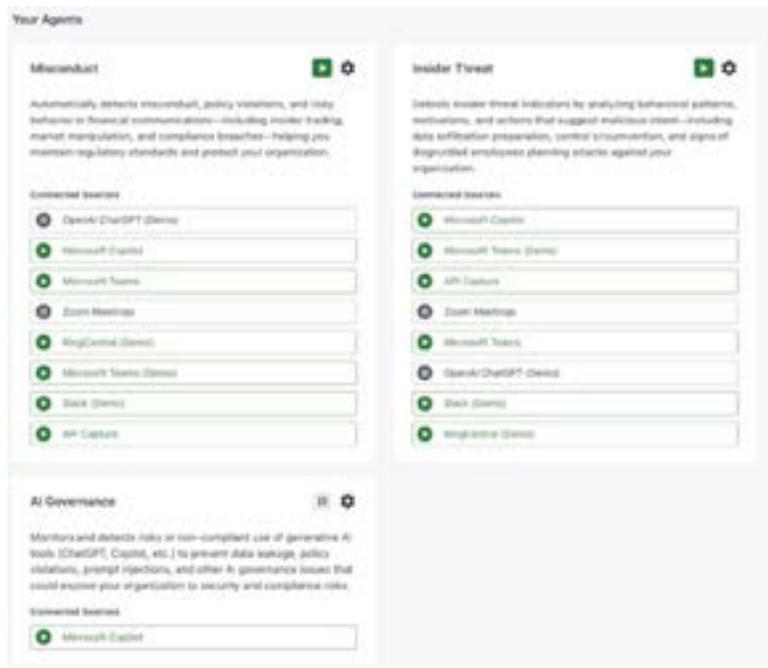

Figure 1: Nuclei Suite offers agentic AI features for uncovering and mitigating risks in digital communications.

Figure 2: Nuclei Suite natively captures content from a diverse set of digital communications channels.

Compliance-grade from day one

Nuclei Suite provides defensible and explainable compliance capabilities out of the box, without sacrificing ease of use.

These capabilities include:

- Write Once, Read Many (WORM)–compliant retention and immutability
- Secure, encrypted storage that complies with System and Organization Controls 2 (SOC 2) and the Payment Card Industry Data Security Standard (PCI DSS)
- Audit-ready reporting, built-in reconciliation features, and full chain of custody

Built for modern communications

Nuclei Suite captures and archives digital communications across email and modern collaboration platforms. This helps ensure compliance coverage wherever employees collaborate.

Scales with your business needs

Start with a complete compliance foundation that includes 10 gigabytes of pooled archival storage per employee, per connection. Then, expand seamlessly as your regulatory or business needs evolve:

- Add optional supervision and agentic AI workflows for analyzing communications and uncovering compliance

and conduct risk.

- Add additional users or extra archival storage easily by expanding your license and subscription.

Ideal customers

Nuclei Suite is the ideal solution for:

- Small- to medium-sized regulated organizations or highly litigious firms
- E-discovery-led buyers seeking improved search performance without added costs
- Compliance-led buyers seeking simplicity without compromise

The Proofpoint advantage

Proofpoint Nuclei Discovery and Archive Suite delivers enterprise-grade features for regulatory compliance and investigation readiness, combined with consumer-grade ease of use and cost-effectiveness. Nuclei Suite helps organizations deploy faster, operate smarter, respond more quickly to e-discovery requests, and feel confident in their compliance posture.

proofpoint

About Proofpoint, Inc. Proofpoint, Inc. is a global leader in human- and agent-centric cybersecurity, securing how people, data and AI agents connect across email, cloud and collaboration tools.
