

# Your Data and Identity Threat Assessment

## Data Protection Approach

- 1 Industry leading secure
- 2 Only required data is used  
No passwords taken
- 3 Robust data protection  
and deletion policy

SOC 2 TYPE II  
CERTIFIED

## Your data is important to us

- Proofpoint takes data security very seriously and has created a strong platform and process for the identity threat assessments.
- Built on one of the most secure platforms in the world with individual instances to prevent data leakage
- Ephemeral deployment with all data destroyed after assessment

## Threat assessment platform security

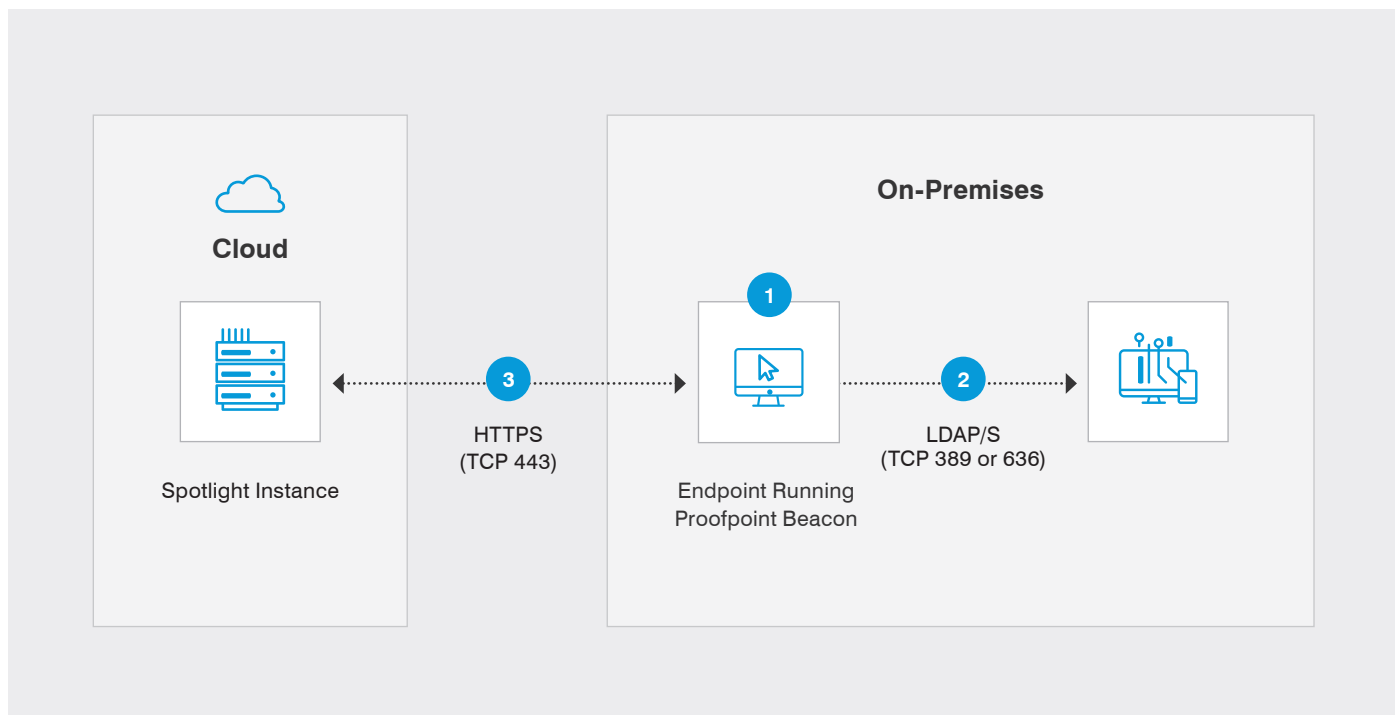

- Proofpoint's Identity Threat Defense platform creates a custom-built instance in AWS for each assessment
- Proofpoint AWS environments are ISO 27001, SOC 1,2&3 and GDPR compliant
- Proofpoint utilises multiple availability zones meaning your data never leaves

## Proofpoint data protection policy

- Only your Proofpoint representative and yourself will have access to the data
- No passwords identified are stored by Proofpoint at any point
- Any data held in the cloud is destroyed once the assessment is complete
- Proofpoint is 27001 certified and regularly tested both internally and by third parties

## How assessment works

- One-time scan using a portable wizard application called Beacon on 1 endpoint (laptop or desktop in IT department)
- Threat analysis information is sent via an encrypted channel to client-dedicated instance of Proofpoint's Identity Threat Defense Central Management server
- Data analysis is done by Proofpoint's Identity Threat Defense experts; report shared with client
