

Compromised Account Workshop

Detect and defend against unauthorized use of your accounts

Key Benefits

- Get trained in best practices for detecting and responding to compromised accounts
- Leverage the knowledge and expertise of some of the world's top security experts
- Learn about common attack vectors, motives behind these kinds of attacks and what to expect when an account has been compromised

Bad actors are increasing their attempts to gain access to company information through individual accounts. The strategy, after all, works and can be quite profitable. But Proofpoint is here to help.

Our special Compromised Account Workshop helps protect your organization from this kind of vulnerability. It covers Proofpoint best practices for detecting and alerting you to compromised accounts. It also provides guidance for how to respond to them when you find them.

Who Facilitates the Workshop

The Proofpoint Professional Services Team facilitates the workshop. This team includes some of the world's leading mail experts. It has helped more than 1,500 organizations around globe evolve their mail architectures. Our clients include some of the smallest companies to some of the world's largest, including Microsoft and Google G Suite customers. We have helped these companies improve their security postures. With extensive hands-on experience leading customers through major security implementations, our consultants can offer invaluable insight on compromised accounts.

Agenda

- Threat Landscape: Compromised Accounts
 - Where is this happening?
 - What's motivating the bad actors?
 - What to expect when bad actors have stolen credentials
 - Common attack vectors
- How to detect and respond to account compromise
- Steady state recommendations/on-going protective measures

What to Expect from this Workshop

The workshop involves three phases. This section describes each of them.

Engagement planning

Your Proofpoint Professional Services Consultant will facilitate the kick-off and planning meetings. Together we will review the scope of the workshop. You will also discuss your current prevention, detection and remediation strategies for account compromise. And we will review customer requirements and planned use of features and functions.

Facilitated workshop

An agenda for a typical facilitated workshop is to the left.

The workshop is delivered in a half- or full-day session. And it can be given remotely or at your location.

We will review Proofpoint threat data related to account compromises. We will also introduce approaches for prevention, detection and remediation. And we will develop a plan for improving all of them.

Postworkshop documentation

The Proofpoint consultant will provide a written summary of recommendations for combating compromised accounts.

What Is Required of You

Your team's commitment throughout the process is needed to ensure success.

Before the workshop, identify the key stakeholders in this process. These stakeholders may include technical influencers and members of the leadership team. At a minimum, this typically includes management sponsors and technical leads from messaging and security teams. Other common stakeholders include identity management or directory services teams and service owners.
