

# Proofpoint Email Rapid Risk Assessment

Are you concerned about phishing emails, social engineering and ransomware? The Proofpoint Email Rapid Risk Assessment provides an instant report of the health of your email environment to show threats and attacks that reach end-user mailboxes. It reveals gaps in your current solution based on reporting from the last two weeks. The best part is it only takes five minutes to set up.

Message counts for attachment and URL threats across an organization's clusters.

## Why take an Email Rapid Risk Assessment?

- Email remains the No.1 attack vector.
- Get an instant understanding of what might be bypassing your current email solution.
- Available for Microsoft Office 365.

## Get started today

Our Email Rapid Risk Assessment:

- Takes just five minutes to deploy.
- Provides an instant two-week history.
- Identifies threats facing your people.
