

Proofpoint Threat Information Services—TIS

Actionable threat intelligence from the latest developments on the No. 1 threat vector

Key Benefits

- Identify, understand and prioritize threats efficiently
- Make better decisions faster
- Optimize placement and use of scarce resources
- Prevent disruption and loss from advanced threats

The Proofpoint Threat Information Service (TIS) provides you with industry-leading intelligence and guidance to help protect you against today's email threats. It leverages Proofpoint expertise in email-based security to deliver unique visibility into the front of the attack kill chain. The service provides context beyond standard dashboard reports or security information and event management (SIEM) feeds.

TIS is one tier in the Proofpoint Threat Information Services offerings. Other tiers include Premium Threat Information Service (PTIS) and Premium Threat Information Service Plus (PTIS Plus). (For more information about Proofpoint Threat Information Services, see www.proofpoint.com/us/resources/data-sheets/proofpoint-threat-information-services.)

TIS is ideal for organizations that want to know the latest trends in the email threat landscape and get actionable recommendations to mitigate risk. It helps teams stay abreast of today's most critical email-borne dangers. And it helps them quickly understand these threats and prioritize their responses to them.

TIS provides you with:

- Daily, weekly and monthly contextual threat intelligence reports from our expert threat analysts
- Indicators of Compromise (IoC) from the reports in a digestible feed
- Advanced insight with actionable intelligence

Contextual Threat Intelligence

Our contextual threat intelligence gives you insights into the threat landscape. You can use this data to compare your threat landscape with global and vertically relevant trends and identify similarities and differences. These insights can also help you to:

- Gain awareness of the latest threat and actor developments in the global threat landscape
- Understand particular trends, threats and actors with actionable recommendations and IoCs
- Keep all levels of your security team and leadership abreast of threats and train them to mitigate risk

Advanced Insight

We provide you with daily, weekly and monthly analyses. These give your team visibility into the latest threats and threat-actor developments in the front of the attack chain for the primary threat vector. They also give you early warning, which you can use to adopt proactive defenses and improve your security posture. The intelligence comes by way of as-it-happens researcher write-ups. It also comes from a curated feed of IoCs for email threats around the globe.

Use these insights to:

- Monitor when actors change tactics, techniques and procedures (TTPs)
- Learn about new techniques when they appear
- Discover and learn more about the threats that target your vertical before they appear in your own mail flow

Features

TIS includes the following:

- **Daily Analyst Logbook and curated IoCs.** These cover global email campaign activity.
- **Weekly Threat Insight reports.** These cover the latest in the global threat landscape for stakeholders.
- **Weekly Threat Update reports.** These cover deep-dives into a particular threat actor, malware, technique or trend recently observed in the landscape. The reports include actionable mitigations, recommendations and IoCs.
- **Weekly executive briefs.** These are designed for a high-level audience. The brief covers the key parts of the email threat landscape that week.
- **Benchmarking against other Proofpoint customers.** This includes industry-specific and global data in a monthly threat report.
