proofpoint.

PROOFPOINT THREAT RESPONSE AUTO-PULL COURSE
PROOFPOINT ACCREDITED ADMINISTRATOR

The Proofpoint Threat Response Auto-Pull (TRAP) course examines installation and configuration from the point of view of customers working with Proofpoint Professional Services. This PAA course is based on Threat Response version 3.5. It is recommended for users and administrators who need to know how to install, configure, monitor, and troubleshoot TRAP during and after the Professional Services deployment.

Take the exam to test your knowledge and earn your Proofpoint Accredited Administrator certificate for Essentials. You need a passing score of 75% to get certified. There are no prerequisites for this course.

COURSE OUTLINE

Module 1: Course Overview
Discover how the course aligns with Professional Services and how to get the most out of the course.

Module 2: TRAP Kickoff
Explore what happens during and after the kickoff call, including follow-up tasks such as information gathering and VM installation.

Module 3: Configuration
Add users, configure email alerts and communicate with Targeted Attack Protection (TAP).

Module 4: Configuring Microsoft Office 365
Create quarantine and service accounts in Office 365 and configure TRAP to automatically quarantine messages.

Module 5: Configuring G Suite
Create a project and quarantine account in G Suite and configure TRAP to automatically quarantine messages.

Module 6: Navigation
Navigate the TRAP user interface and identify the portions that are needed to get the most out of TRAP.

Module 7: Threat Response Usage
Quarantine email imported from Smart Search, CSV files and the Abuse Mailbox monitor

Module 8: Appliance Maintenance
Execute backup and restore configurations, perform system upgrades and collect information for technical support.

Exam: PAA for Threat Response Auto-Pull Exam
Test your knowledge and earn the Proofpoint Accredited Administrator for Threat Response Auto-Pull certificate.
