2021 State of the Phish Report

Proofpoint has released their annual State of the Phish report that looks at user awareness, vulnerability, and resilience. More data-rich than ever, this seventh annual study features analysis of survey responses, simulated phishing exercises, and real-world attacks to provide insights into phishing and other cyber threats—and what you can do about them.

We surveyed 3,500 working adults and 600 IT security professionals from across the world.
