Protecting People Podcast
In our latest episode, we interview Roie Cohen Duwek, Director of Security Research at Proofpoint, about privilege-based attacks. We talk about why EAC attacks are so insidious and effective and what CISOs should do to protect their employees.

What’s up with Symantec?
Still concerned about Broadcom’s new go to market – or lack thereof – with email security? See Proofpoint’s full library of resources to help you move your existing Symantec business to Proofpoint or selling into competitive accounts.

March Webinar On-Demand
Protect Your Customers from the #1 Threat Vector
Email continues to be the #1 threat vector. Attackers consistently use email as the vector to launch attacks – because it works. So, your customers can’t settle for a “good enough” email security solution that doesn’t stay ahead of threats like phishing and BEC. If their current solution isn’t investing in staying ahead of these types of attack, they have a higher risk of breach and financial loss. Watch this replay to learn:
- How to leverage top business drivers to identify opportunities in your account
- How to present Proofpoint’s portfolio as the best choice for your customers
- How to use our prospecting tools to build qualified pipeline
