

LEVEL ONE

CASB AND CAD FUNDAMENTALS

FORMAT

Web-based Training (WBT)

DURATION

50 minutes

INTENDED AUDIENCE

Security Admin, Security Analyst,
Incident Responder

REGISTRATION

Contact training@proofpoint.com
for registration information.

Today's cyberattacks target people and the way they work. Much of that work happens over cloud-based email and other SaaS apps such as Office 365, G Suite, and Box. These apps contain sensitive data, which must be protected. This course introduces Proofpoint Cloud Solutions to customers of both Proofpoint Cloud App Security Broker (PCASB) and Cloud Account Defense (CAD) security solutions. It serves as the basis for additional role-based training for administrators and incident responders implementing CAD and PCASB to address threats, and PCASB customers to address DLP and Application Governance requirements.

COURSE OUTLINE

Lesson 1: Course introduction

This lesson introduces the CAD and PCASB learning paths and how to make the most of self-paced training.

Lesson 2: Threats in the cloud

This lesson explains how threats in the cloud impact businesses.

Lesson 3: Proofpoint cloud solutions

This lesson describes how TAP for SaaS Defense, Cloud Account Defense, and Proofpoint Cloud App Security Broker address cloud threats.

Lesson 4: Use cases: Threats

This lesson provides examples of use cases where CAD and PCASB can be used to detect and remediate threats, reducing criminal dwell time.

Lesson 5: Use cases: Data Loss Prevention (DLP)

This lesson provides examples of use cases where PCASB, alone or combined with other DLP applications, can be used to prevent data loss.

Lesson 6: Use cases: Application governance

This lesson provides examples of PCASB identifying risky third-party applications and providing visibility into applications linked to corporate cloud assets.

Lesson 7: Navigation

This lesson describes how the user interface is organized and the information you can access through the various pages.

Lesson 8: Support

This lesson describes how to find information in the Proofpoint Communities and how to open a support case in PCSC.

ABOUT PROOFPOINT

Proofpoint, Inc. (PFPT) is a leading cybersecurity company that protects organizations' greatest assets and biggest risks: their people. With an integrated suite of cloud-based solutions, Proofpoint helps companies around the world stop targeted threats, safeguard their data, and make their users more resilient against cyber attacks. Leading organizations of all sizes, including more than half of the Fortune 1000, rely on Proofpoint to mitigate their most critical security and compliance risks across email, the cloud, social media, and the web. More information is available at www.proofpoint.com.
