Incident Responders

REGISTRATION

Contact training@proofpoint.com
for registration information.

Proofpoint Cloud Account Defense (CAD) and Proofpoint Cloud App Security Broker (PCASB) provide visibility into what activity is occurring in the cloud. In this course you will learn how to use the application to detect suspicious logins, determine what activities users have been performing while in the cloud, and locate suspicious files that have been uploaded into your cloud file repositories.

COURSE OUTLINE

Lesson 1: Suspicious Logins and Activity

This lesson describes how to use alerts and activity to find suspicious logins and suspicious activity.

Lesson 2: Tracking Suspicious Logins

This lessons shows you how you can document what has occurred since a suspicious login and what remediation actions the system has taken.

ABOUT PROOFPOINT

Proofpoint, Inc. (PFPT) is a leading cybersecurity company that protects organizations' greatest assets and biggest risks: their people. With an integrated suite of cloud-based solutions, Proofpoint helps companies around the world stop targeted threats, safeguard their data, and make their users more resilient against cyber attacks. Leading organizations of all sizes, including more than half of the Fortune 1000, rely on Proofpoint to mitigate their most critical security and compliance risks across email, the cloud, social media, and the web.
