Contact training@proofpoint.com for registration information

The course incorporates best practices and step-by-step processes including permissions, key concepts, native applications, built-in policies, understanding actions on unauthorized apps (log, hide, notify and/or delete), creating a new policy, searching and adding an app, edit, delete and revert a policy and using the audit log.

COURSE OUTLINE**Lesson 1: Definition, Permissions and Access**

Understand an app policy, required system permissions and how to access in Social Patrol

Lesson 2: Key Terms in a "Flash"

Understand key terms associated with app policies including Authorized, Native Application, Marketing and Publishing Applications and Unauthorized

Lesson 3: Built-in App Policies

Describes the two types of built-in app policies: Log All Apps and Block All New Content

Lesson 4: App Policy Actions

Describes the four actions that can automatically occur on an unauthorized app: log, notify, hide and/or delete

Lesson 5: Create a New App Policy

Describes how to customize an app policy by using "New Policy"

Lesson 6: Edit an App Policy

Describes how to enable or disable authorized apps and change the actions taken on unauthorized apps, using "Edit Policy"

Lesson 7: Search to Find and Add an App

Describes how to determine if an app is pre-populated within a category list and how to manually add and authorize an app

Lesson 8: Delete or Revert an App Policy

Describes how to delete or revert a customized policy

Lesson 9: Audit Policy Log

Describes how to access and review audit log changes by date and user and exporting a log to a CSV file
