Contact training@proofpoint.com for registration information.

The Proofpoint Level One—Email Fraud Defense course provides an overview of Proofpoint Email Fraud Defense, a thorough grounding in understanding email fraud, and how to use Email Fraud Defense to protect against it.

COURSE OUTLINE

- **Lesson 1: Email Fraud Threats**
Provides an overview of the mail fraud threats, including spam, phishing, spoofing. It also explains how the Email Fraud Defense can help protect against them.
- **Lesson 2: Email Authentication**
Looks at the three main authentication protocols: SPF, DKIM and DMARC. It also explains the importance of DMARC as the only means to ensure email authentication for your domains.
- **Lesson 3: Implementation Requirements**
Examines the product onboarding process, email governance and monitoring, policy enforcement and evaluation, and ongoing maintenance.
- **Lesson 4: Authentication Tab Overview**
Explores the Email Fraud Defense Authentication tab and looks at domains and data filtering.
- **Lesson 5: Reporting and Set-up**
Provides an overview of the Email Fraud Defense reporting capabilities, as well as managing domains, IPs and alerts.
- **Lesson 6: Threats Tab Overview**
Gives a detailed explanation of the product's Threats tab functionality and takes a closer look at filtering, details views, and employee threats.
- **Exam: Level One for Proofpoint Email Fraud Defense**
Test your knowledge and earn the Proofpoint Level One Email Fraud Defense certificate.
