

LEVEL ONE

PROOFPOINT EMAIL FRAUD DEFENSE

The Proofpoint Email Fraud Defense course provides you with an overview of our solution and a thorough grounding in email fraud. You will learn how to use Email Fraud Defense and Email Brand Defense to protect against these types of threats. We recommend this course for administrators who are new to Email Fraud Defense. This one-hour web-based training course has no prerequisites.

COURSE OUTLINE—OVERVIEW

Module 1: Email Fraud Threats

Get an overview of email fraud threats—including spam, phishing and spoofing—and find out how Email Fraud Defense and Email Brand defense help protect against them.

Module 2: Email Authentication

Review the three main authentication protocols—SPF, DKIM, and DMARC—and understand why DMARC is the only way to ensure email domain authentication.

Module 3: Implementation Requirement

Learn about the product onboarding process, email governance and monitoring, policy enforcement and evaluation, and ongoing maintenance.

Module 4: UI Overview

Walk through the Email Fraud Defense user interface, with special attention to domains, data filtering, reports and alerts.

Module 5: Email Brand Defense

Get a detailed explanation of Email Brand Defense functionality, looking at filtering, drilling down into detail views and creating brand defense whitelists.

Exam: Proofpoint Accredited Administrator for Proofpoint Email Fraud Defense

Test your knowledge and earn the Level One certificate for Email Fraud Defense.
