

LEVEL ONE

PROOFPOINT ENTERPRISE ARCHIVE ADMINISTRATION

The Proofpoint Enterprise Archive Administration course provides instruction on basic use of the archive and an overview of how the archive works and its administrative functions. This 45-minute web-based training course is based on Enterprise Archive version 4.0. It is recommended for users and administrators who need to know how to use search, advanced search, saved search, folders and export. It also shows you how to interact effectively with product support to complete administrative tasks in the archive.

Take the exam to test your knowledge and earn your Level One certificate for Enterprise Archive Administration. There are no prerequisites for this course.

COURSE OUTLINE

Module 1: Search

Conduct a basic search in the message subject, body and attachments and review the results.

Module 2: Advanced Search

Search the archive to expand filters as a way of refining search results beyond basic search.

Module 3: Saved Search

Learn how to save and organize search criteria and re-use the criteria at a later time to make your search more efficient.

Module 4: Folders

Collect and organize your personal archive search results into archive folders to store specific search results.

Module 5: Exports

Export messages from the archive for use on external systems.

Module 6: Archive Administration Overview

Gain knowledge about how the product works, the name resolution process, control of user permissions, use of information tags, message retention policies, disposition process, use of roles, departments, and partners, archive audit trail and reporting and how to work with the product effectively.

Exam: PAA for Proofpoint Enterprise Archive Administration Exam

Test your knowledge and earn the Level One for Proofpoint Enterprise Archive Administration certificate.
