

# LEVEL ONE

# PCASB AND CAD THREAT CONFIGURATION

## FORMAT

Web-based Training (WBT)

## DURATION

50 minutes

## INTENDED AUDIENCE

Customers, partners, and employees in a security administrator role

## PREREQUISITE

None

## REGISTRATION

Contact [training@proofpoint.com](mailto:training@proofpoint.com) for registration information.

Proofpoint Cloud Account Defense (CAD) and Proofpoint Cloud App Security Broker (PCASB) use a variety of enrichment sources and analytics to detect suspicious logins and suspicious activity. As a security administrator, you can create rules to alert appropriate parties and perform remediation if desired. This course will show you how to create and modify rules in CAD and PCASB to protect your organization from account compromise and malicious files by providing visibility to what is happening in the cloud.

## COURSE OUTLINE

### Lesson 1: Introduction

This lesson introduces rule configuration, rule components, and remediation options

### Lesson 2: Configuring Rules

This lesson explains how to configure rules in the user interface.

### Lesson 3: Suspicious Logins

This lesson provides an example of why we need to detect suspicious logins and how to create rules to detect suspicious logins.

### Lesson 4: Suspicious Activities

This lesson provides an example of why we need to detect suspicious activities and how to create rules to detect suspicious activities.

### Lesson 5: Hybrid O365 / TRAP Integration

This lesson explains how and why to your hybrid O365 environment and Threat Response Auto-Pull (TRAP) to allow the suspend user and force password change on the next login remediation options.

## ABOUT PROOFPOINT

Proofpoint, Inc. (PFPT) is a leading cybersecurity company that protects organizations' greatest assets and biggest risks: their people. With an integrated suite of cloud-based solutions, Proofpoint helps companies around the world stop targeted threats, safeguard their data, and make their users more resilient against cyber attacks. Leading organizations of all sizes, including more than half of the Fortune 1000, rely on Proofpoint to mitigate their most critical security and compliance risks across email, the cloud, social media, and the web.
