Proofpoint Threat Information Services

Make better security decisions with expert email-threat information and guidance

KEY BENEFITS

• Identify, understand and prioritize threats efficiently
• Make better decisions faster
• Optimize placement and use of scarce resources
• Prevent disruption and loss from advanced threats

Proofpoint Threat Information Services provide you with industry-leading intelligence and guidance to help you protect yourself from today’s email threats. The services place our expertise in cybersecurity at your disposal.

Proofpoint Threat Information Services come in three tiers: Threat Information Service (TIS), Premium Threat Information Service (PTIS) and Premium Threat Information Service Plus (PTIS Plus). Each helps you stay abreast of today’s most critical email-borne dangers. They help your teams to quickly understand these threats and effectively prioritize their responses to them. The services offer visibility into the front of the attack kill chain and give you insights about threats and actors that standard dashboard reports or SIEM feeds cannot provide. Our services provide you with:

• Contextual threat intelligence from our expert threat analysts
• Advanced insight with actionable intelligence
• Tailored threat analysis for ongoing and emerging threats

CONTEXTUAL THREAT INTELLIGENCE

We provide you with individualized reports, briefings and weekly intelligence analyses. These give you insights into the threat landscape as it relates to your organization. You can use this data to:

• Understand the threats and actors that target your organization
• Compare your organization’s status with that of your industry peers
• Keep all levels of your security team and leadership abreast of threats and train them to mitigate risk

ADVANCED INSIGHT

We provide you with daily, weekly and monthly analyses. These give your team visibility into the latest threats and threat-actor developments. This can give you early warning, which helps you to adopt proactive defenses and improve your security posture. The intelligence comes by way of as-it-happens researcher write-ups as well as a curated feed of indicators of compromise (IOCs) for email threats around the globe.
Use these insights to:

- Monitor when actors change tactics, techniques and procedures (TTPs)
- Learn about new techniques when they appear
- Discover and learn more about the threats that target your vertical before they appear in your own mail flow

**TAILORED THREAT ANALYSIS**

We provide your team with analyst inquiries, briefings and exclusive webinars that help them understand the status of email threats to your organization. We can provide your teams with specialized insights tailored to your security needs. These include:

- Answers to tactical and strategic questions
- Deep analysis of email threats
- Research assistance for board-level presentations

We offer a wide range of services to help. These include everything from actionable intelligence reports to custom inquiries to assistance with implementing defensive mitigations. The following table provides an overview of what we have to offer.
