

Proofpoint Digital Risk Managed Services

Proofpoint Digital Risk Managed Services helps your organization's team of analysts proactively monitor and secure your company's digital investments. Our Managed Services team detect fraudulent domains and social media accounts that are associated with your brand.

Support

Proofpoint has an experienced analyst team providing rapid threat detection and escalation.

- High Volume Comparison** Covering 10 major social media platforms and comparing your brand owned web properties with over 400M.
- In-depth Analysis** Daily detailed analysis of social and domain-based threats with rapid escalation to your key locations.
- Rapid Remediation** Highly successful social and domain takedown capabilities means threats can be quickly removed or blocked.

Customization

Detailed threat intelligence reporting to suit any audience.

- Custom Configuration** Choose from collaborative or hands-off configuration for all aspects of the project to suit your business.
- Expert Guidance** Expert recommendations covering everything from workflow, remediation and best practices.
- Real-time Escalation** Rapid alerting for significant and imminent threats to keep teams informed.
- Detailed Reporting** Actionable threat reporting to fully understand and protect against threats surrounding your organization.

Time and Cost Savings

Save on internal spend while using advanced threat detection capabilities.

- Immediate ROI** Reduce internal spend and time resources. We provide end-to-end management of social and domain threats.
- Experienced Analysts** Utilize an experienced team with advanced detection capabilities to suit your business no matter the size of your footprint.

Advanced Protection

Protection for your people and customers by reducing exposure to malicious domains and social media accounts.

- Safeguard Users** With Virtual Takedown, customers can quickly reduce user, business partner and employee exposure to malicious domains.
- Streamlined Remediation** Submit domains to leading blocklists used by a wide array of ISPs, devices, apps, web services and security products.
- Multiple Threat Detections** Protection against phishing, malware, counterfeit goods and business email compromise.
