

PROOFPOINT SOCIAL PROFILE MANAGER

MEET COMPLIANCE REQUIREMENTS WITH AUTOMATED SOCIAL MEDIA PROFILE SUPERVISION

KEY BENEFITS

- Automate regular review of agent profiles with timed reminders, built-in approval workflows, and easy archiving
- Receive near-real-time notifications when unauthorized profile changes are detected
- Easily revise static content or revert to an approved version of a profile—all with the push of a button

The SEC, FINRA, and NASD each have rules for how your financial service company manages social media accounts and communications. These regulations also extend to your firm's financial advisors. For static content, your company is required to regularly review and approve advisors' social profiles. You must also provide documentation that tracks these reviews.

Proofpoint Social Profile Manager simplifies your efforts to meet these requirements with automated supervision of your designated social media profiles. Our seamless workflow and pre-built compliance reports save you time and resources with a turnkey system for meeting mandates for static social-media content.

KEY FEATURES

Automated Profile Management

Social Profile Manager reduces the time and resource burden of manually auditing your advisor's profiles. You decide which profiles need to be managed and how often. We take it from there. Your compliance team receives alerts when a profile is due for periodic inspection. We also send automated communication to your advisors with the details of their profile review.

Easy Reversion for Unauthorized Changes

Social Profile Manager integrates with social networks via APIs and continuously monitors your advisors' accounts for profile changes. You'll receive an alert whenever the solution detects a change. With the push of a button, you can revert the account to your preapproved settings.

Streamlined Workflow Process

Social Profile Manager provides an automated workflow system that documents your profile supervision and simplifies your process. Each profile in your task list receives a unique compliance number, making it easy to track. From the initial review request to the final approval, you always know the status of every profile and what requires your attention.

FLEXIBLE, COMPREHENSIVE REVIEW OPTIONS

Social Profile Manager highlights profile changes so you can immediately see what requires your attention. And you have flexible review options, including these:

- Approve all sections with a single click
- Approve specific sections and reject others
- Make edits directly
- Reject changes and automatically revert the profile to its previous version
- Forward to a second-level reviewer

TURNKEY COMPLIANCE REPORTS

We remove the complexity of compliance reporting with a pre-built compliance report that provides a detailed audit log. At a glance, you can see all the social profiles that were reviewed, the changes made, the turnaround time, and more.
