

# Proofpoint Managed Services for Email Security

## Get best-of-breed services for best-of-breed email security

### Products

- Proofpoint Email Protection
- Proofpoint Targeted Attack Protection

### Key Benefits

- Get customised service and guidance from the leaders in email security
- Improve risk posture and visibility
- Operate efficiently with predictability and cost effectiveness

Finding the right staff to manage email security isn't easy. Ramping up new employees to full productivity can take months. But finding good, skilled people for your cybersecurity staff is only part of the challenge—it can be equally difficult to retain them. And when they leave, your operations may be hit with unexpected disruptions that can pose lasting and significant risk to the organisation. Proofpoint can help. Our Managed Services for Email Security provides you with a diverse staff of highly skilled experts to address your email security needs.

Our managed service helps you get the most out of your investment in our advanced email security products. Our sophisticated programme reduces your operational overhead by leveraging our skilled experts to improve your risk posture and stay ahead of advanced attacks. And with a flat, annual fee, our programme is cost effective. It also provides executive summaries and reporting to show your stakeholders how your security posture improves over time and how your investment is producing healthy returns.

### Proactive Protection with a Trusted Partner

In an email threat landscape that shifts daily, more organisations in the Fortune 100, Fortune 1000, and Global 2000 trust our email security solutions to protect them than any of our competitors. With our breadth of knowledge and experience, we have the insight to provide you with invaluable context about how and why you're being attacked, as well as the ability to change your systems' configuration proactively for better defence.

## Improved Risk Posture with Optimised Defensive Systems

With email being the No. 1 threat vector, you must protect against threats like ransomware and business email compromise. We leverage our extensive knowledge of the threat landscape to ensure your defensive systems stay ahead of advanced threats that target your organisation. With our Managed Services for Email Security, you will be working with an in-house Proofpoint team, so your staffing and retention situation won't impact your security posture. You can rest assured that your protection will be consistent and you'll always receive the latest features and releases. And we will provide continuous monitoring and adjustments of your configuration.

## Prioritised Support

With Proofpoint's Managed Services for Email Security, you'll be at the front of the line for any issues you may encounter. When you come across any problems that require our attention, you'll receive faster support and remediation than customers who do not have the service.

## Enhanced Security Strategy Leveraging Proofpoint Visibility

Proofpoint takes a people-centric approach to security. With our Managed Services for Email Security, you'll have access to our unique insights, like our Very Attacked People™ (VAPs), and regular health checks. These provide clear context about how and why threats target your organisation. We'll work with you to access this critical data and keep you up-to-date on other reporting enhancements. And your teams can leverage this data to start conversations with stakeholders and prioritise other technical controls.

## Get Continued Buy-In With Proof of Success

Proofpoint Managed Services for Email Security gives you reports to prove how your security posture is improving. From functional incident reporting and tracking to meaningful executive summaries, we provide the reporting and programme management you need to ensure you can get continued buy-in from key stakeholders.
