

# Proofpoint Content Capture for Zoom

## PRODUCT PREREQUISITES

Zoom Pro plan or higher

Whether it's to meet regulatory or corporate governance requirements, your firm needs to capture and retain employee communications content. Proofpoint makes it easy to capture, manage and retain data from your content sources, including Zoom. Using the Zoom API, we capture business IM chat content and deliver it to your archive for e-discovery, compliance and supervision.

## What we capture

Content Capture collects the following types of Zoom Business IM chat activity:

- Direct Chat (1:1) messages and actions
- Group Chat messages and action
- In-meeting chat

We expect to add more activity and content types on an ongoing basis as supported by Zoom APIs.

## How we get it to your archive

We deliver all captured Zoom content to your archive via email. Content Capture uses Zoom APIs via HTTPS requests to retrieve message activity from Zoom. Then, we send it to a designated mailbox for delivery to your enterprise email archive.

## Summary

With Proofpoint, you can capture Zoom content with ease. It's a win-win. Your employees are free to collaborate and communicate. And you reduce your compliance risk and adhere to regulations.
