REGISTRATION

Contact your account representative or training@proofpoint.com for registration information.

This course will walk you through the day-to-day activities of a Reviewer within the Proofpoint Supervision platform, including interpreting Dashboard information, accessing, and acting on messages in your review queue. You will also practice using available tools and techniques to improve your review efficiency and reduce false positive flags. The course also shows you how to run reviewer related reports and interpret their results. At the conclusion of the course, you will receive reference material for future use.

COURSE OUTLINE**Lesson 1: Proofpoint Supervision Overview**

This lesson explains the how Proofpoint Supervision works with Proofpoint Archive. It covers common terminology and the roles of individuals who interact with Proofpoint Supervision. It also describes a typical workflow and common review actions.

Lesson 2: Proofpoint Supervision Access and Dashboards

Proofpoint Supervision allows administrators and reviewers to have access via a specific web user interface. Once you have access to the system, you can access information about activities and message review status in several ways.

Lesson 3: Message Review

This lesson looks at the use of the Reviewer and Compliance Risk Dashboards for each reviewer to quickly access real-time information about messages in their queue and monitored staff. This also shows reviewers multiple methods to access messages for review, and the process to act on the messages in their queue.

Lesson 4: Past Review

Past Review allows reviewers to review action previously taken on messages. Reviewers use Past Review to close out messages that await additional action.

Lesson 5: Investigate Search

Reviewers use Find Related and Search to find similar messages in the archive to those currently being reviewed. Search allows reviewers to review action taken on messages.

Lesson 6: Reports and Alerts

Reports can help assess message patterns and behavior and help evaluate the effectiveness and enforcement of policies. This lesson explains reports affecting reviewers and how to schedule, run and view results of relevant reports.

ABOUT PROOFPOINT

Proofpoint, Inc. is a leading cybersecurity company that protects organizations' greatest assets and biggest risks: their people. With an integrated suite of cloud-based solutions, Proofpoint helps companies around the world stop targeted threats, safeguard their data, and make their users more resilient against cyber attacks.
