

PROOFPOINT ITM SAAS TRAINING PACKAGE

FORMAT

Offered as Virtual Instructor Led Training (VILT) or Instructor Led Training (ILT).

SKU

Public Class: **PP-TRN-ITM-SAS-L2**

Private Class: **PP-TRN-ITM-SAS-NEW**

DURATION

2 days

INTENDED AUDIENCE

Information Security Analysts, Administrators, and Insider Threat Management Team members responsible for the configuration and administration of the solution. These students may be either administrators of the solution and/or consumers of the solution's data.

PREREQUISITE

Familiarity with concepts and terminology common to the themes of Insider Threat Management.

REGISTRATION

Contact your account representative or Training@proofpoint.com for registration information.

The first day of this course teaches students how to set up and configure the administrative features of the Proofpoint Insider Threat Management (ITM) SaaS product. This Instructor-led Training (ILT) course prepares the learner to configure the product to monitor and generate alerts on risky data activities by users. The second day of this course teaches students how to use the analytic features of Proofpoint Insider Threat Management (ITM) SaaS product. This Instructor-led Training (ILT) course prepares the learner to examine and interpret information available on the Insider Threat dashboard. It also teaches students how to explore and further filter data detected by the agent to monitor and capture potentially risky user activities. Lessons encourage student interaction and include lecture, demonstrations, and hands-on lab exercises.
