

Product Introduction

Human Resilience Workbench

Identify, prioritize, and reduce human risk using a unified view powered by pre-integrated signals.

Key highlights

Measurable Risk Reduction

- Uses pre-integrated signals across behavior, training, and threat exposure
- Enables targeted, risk-based interventions
- Continuously tracks risk reduction over time
- Delivers defensible executive level metrics

Operational Efficiency

- Eliminates the need to integrate and normalize disparate data
- Reduces manual efforts with built-in risk models and workflows
- Accelerates time-to-value with out-of-the box insights
- Scales without increasing operational overhead

Smarter, Targeted Programs

- Focuses effort on highest-risk users and behaviors
- Replaces broad campaigns with precision interventions
- Aligns training with real-world threats

Identify, prioritize, and reduce human risk using a unified view powered by pre-integrated signals with targeted action and measurable outcomes.

What is happening

Proofpoint is introducing Human Resilience Workbench (HRW) — a new, centralized solution for managing and reducing human risk. HRW delivers a unified view of human risk using pre-integrated signals across behavior, training, and real-world threat exposure. By combining these signals into a built-in risk model, HRW eliminates the need to manually aggregate and normalize data. This enables organizations to consistently identify risk, take targeted action, and measure outcomes - all within a single, unified system.

Why it matters

Human risk is one of the leading causes of security incidents—but most organizations lack a consistent way to reduce it.

HRW enables organizations to:

- Establish a consistent, measurable view of risk
- Prioritize the users and behaviors that matter most
- Take targeted action through adaptive controls
- Continuously measure and demonstrated risk reduction

What you can do

Identify and Prioritize Risk

Gain a clear view of your organization's risk posture using pre-integrated signals across behavior, training, and threat exposure.

- Identify high-risk users and behaviors
- Understand where risk is concentrated
- Focus efforts where they have the greatest impact

Take Targeted Action

Move beyond manual campaigns with targeted, risk-based interventions.

- Use built-in Risk Profiles to segment users
- Deliver adaptive training, simulations, and nudges
- Reduce manual effort with pre-configured workflows

Measure and Demonstrate Impact

Continuously track how human risk changes over time.

- Monitor changes in user risk and behavior
- Measure the impact of specific actions
- Deliver consistent, executive ready reporting

Key Capabilities

- Pre-integrated risk signals across behavior, training, and threat exposure
- Built-in risk scoring model with predefined weighting
- Risk-based prioritization of users and behaviors
- Adaptive control orchestration for targeted response
- Continuous measurement and trend tracking

HRW introduces a unified, action-oriented approach to managing human risk, enabling organizations to move from fragmented insights to continuous, measurable risk reduction.

Includes out-of-the box risk profiles and pre-built workflows to get started quickly.

What this means for you

- Spend less time managing data and workflows, more time reducing risk
- Focus on the users and behaviors that matter most
- Align actions to real-world threats and behaviors
- Scale your program without increasing operational overhead
- Consistently measure and demonstrate impact

Availability

Human Resilience Workbench is available to customers with:

- Collaboration Security Prime
- Collaboration Security Tier 3
- Enterprise Prime
- Advanced Threat Protection
- Commercial Prime

proofpoint®

Proofpoint, Inc. is a global leader in human- and agent-centric cybersecurity, securing how people, data and AI agents connect across email, cloud and collaboration tools. Proofpoint is a trusted partner to over 80 of the Fortune 100, over 10,000 large enterprises, and millions of smaller organizations in stopping threats, preventing data loss, and building resilience across people and AI workflows. Proofpoint's collaboration and data security platform helps organizations of all sizes protect and empower their people while embracing AI securely and confidently. Learn more at www.proofpoint.com.
